Unlock Efficiency in Every Order

Optimize your workflow with individually programmed keys, accelerating operations and satisfying customer demands.

Built to Last

Experience effortless cleaning and maintenance with water-resistant and rugged surfaces.

Reliability Redefined

Rely on durability and dependability, with quality Made in Germany to reduce downtime and ensure smooth operations.

Precision in Each Touch

Ensure error-free input, providing clear haptic feedback in busy kitchens, even when wearing gloves.

PrehKeyTec

Input Matters

„The MCI 30 keyboard bump bar is currently in use at some of the largest food management companies, amongst others, and we have received only positive feedback. The bump bar is an ideal addition for input systems in harsh environments. It is more durable and robust than most comparable products in the market.“

Ilan Kritzer
President & CEO VisualTouch USA

In the fast-paced world of restaurants and commercial kitchens, time is of the essence. PrehKeyTec understands the challenges of delivering prompt and reliable service. Our mission is to simplify the daily operations of the catering industry through an efficient bump bar solution.

The key to success lies in optimizing processes, from order receipt to dish preparation and serving. To address the need for swift and secure handling of kitchen displays, we developed a reliable input solution with all relevant keys. Always with a clear goal in mind: enhance the efficiency and intuitiveness of kitchen operations.

Key Features of PrehKeyTec Bump Bars:

Unique Programmability:

Configure the keyboard to meet your specific needs to ensure swift and reliable customer service.

Haptic Feedback:

Essential for kitchen environments where gloves are worn, guaranteeing quick and accurate entries.

Intuitive Layout:

Colored keys arranged in a customized manner, labeled with text or symbols, facilitate simple and convenient operation.

Dust and Splash-Proof:

Designed for extreme conditions, the keyboard can withstand steam, splashing oil, and heat lamps without compromising performance.
